Ambition – Duty - Mission – Value

Our **AMBITION**

Our **Ambition** is to become your support in your operations in order to **drive your personnel to excellence.**

Our **MISSION**

Our **Mission** is to **transmit** experience acquired through years on major international energy projects.

Our **DUTY**

Our **Duty** is to produce excellence at a **competitive price.**

Our **VALUE**

Our **Value** is to put **Human development** in the center of our Action.

What's new with Adinergy ?

The Pedagogical Tools

In order to keep our courses dynamic and make our Trainees actors of their education, our courses are divided in different parts:

Theory – Games - Exercises -
Videos.

The Website

We have imagined our website at the service of our Clients: Through general themes, you are able to choose the Modules and build the courses you think meet the best your Personnel needs.

Courses Evolution

Our courses are permanently up-dated by instructors who are still keeping operational responsibilities and who make the courses adapted to the latest practices of the Industry.

Our main Clients

Adinergy Teaching Modes

Classroom Traditional Learning

Optimal transmission conditions
Client's premises or Adinergy's place in France.

Training day: 6 hours.
Minimum of Participants: 4.

Online Course Animation

Optimized transmission conditions
Use of adapted digital tools for tests and exercises.

Training day: 4 hours.
Minimum of Participants: 4.

Online Course Access

Stand-alone access
Course material + audio comments +
Role-Plays + Interactions +
integrated quiz & exercises.

Training day: Free.
Minimum of Participants: Individual.

E-Learning Adinergy Training Solutions Proposal.

**LIVE-LEARNING
CLASS-LEARNING**

E-LEARNING

COACHING

1

One full Training session of 3 to 5 days. Online or in Classroom.

Access to the main module on e-learning for a defined period.

Possibility to access the e-learning module before the training session.

One individual coaching session by VC: Course Review.

E-LEARNING

COACHING

2

Access to the main module on e-learning for a defined period.

One individual coaching session by VC: Course Review.

Because what is not measured does not improve...

Every Adinergy's training session is opened and closed by on-line Trainees' evaluation !

Adinergy is using the online solution Evalbox.

Upon Client's request, **evalbox** can be utilized by Trainees for their auto-evaluation (self-training), in order to evaluate and improve their knowledge level and acquisition.

Upon completion of Training and final Evaluation, Trainees will be awarded an **Attendance Certificate.**

Online Training Modalities

1

Before Training:
Pre-Course-Questionnaire sent to Trainees. Evaluation of PCQ.

Session Opening:
Instructor's presentation. Trainees presentation & expectations

2

Introduction:
Reminder of participation rules

Introduction:
Presentation of tools.

3

Online evaluation test.

Individual results sharing

4

Training:
Power Point presentation sharing, online individual exercises, business cases, videos sharing & group discussions.

5

Day start:
Online presence sheet signature. Reminder of day before learning content and group discussion to assess good understanding;

6

End of Training:
Conclusion, Group Discussion. Online Evaluation Test, Individual Results sharing, Closing. Training evaluation sent to Trainees,

7

After closure:
Course document + Certificate sent to Trainees.

Assessment summary + Presence sheet sent to Client.

Our Training Solutions

Training Modules: **Introductions:**

Field Life Cycles:
Introduction to O&G
Operations
Duration: 4 Hrs

Supply Chain in
Upstream

Duration: 4 Hrs

Introduction and
Overview of Upstream
Logistics

Duration: 6 Hrs

The 2020 Incoterms

Duration: 4 Hrs

Introduction to
Dynamic Positioning

Duration: 4 Hrs

Supply Chain Management

Definition of the Upstream Supply Chain
Course Duration in Hours: 4
Skill Level: Beginner
Course Outline:
The Supply Chain in the Upstream Industry has its own specificities and is particularly complex due to the globality of the Oil and Gas Industry. It is definitely the organization aiming at securing the Oil and Gas development Projects and Operations.

Supply Chain Management

The Purchasing Process
Course Duration in Hours: 8
Skill Level: Beginner
Course Outline:
A few decades ago, the Purchasing function in an Oil & Gas Company was seen only as a Procurement function, being in charge of supplying Goods and Services defined by the end user. Over the years, the Purchasing function has won its letters of nobility and
